

Ironstone supports Canadian manufacturers
- Ditec Entrematic

COMPREHENSIVE PREVENTATIVE MAINTENANCE PROGRAM

PM Programs are based on customer loyalty. No complicated contracts, no yearly renewal....

Ironstone's standard PM Package insures #1 maximum safety, #2 proper lubrication and component checks to ensure long life of the expensive equipment.

All too often Ironstone technicians repair doors systems that have not been maintained properly and yield expensive repairs that could have been prevented. Much worse, in the case of door operation, Ironstone has seen door systems that are

unsafe and pose a physical threat to a facilities patrons adding needless liability in the event of an accident with a door.

1 866 268 2262

Ironstone stocks most parts for every manufacturers model of pedestrian door automation equipment, whether it be a swing door or slider application.

Broken or damaged guides and carriage wheels on sliders can cause preventable stress and damage to expensive motor gear drives and electronic controllers
